 **Sherwood**

The logo consists of a stylized 'S' shape formed by two concentric, slightly irregular circles, positioned to the left of the brand name 'Sherwood' in a bold, serif font.

SAFETY PRECAUTIONS

WARNING

Before servicing this unit, familiarize yourself with the following precautions:

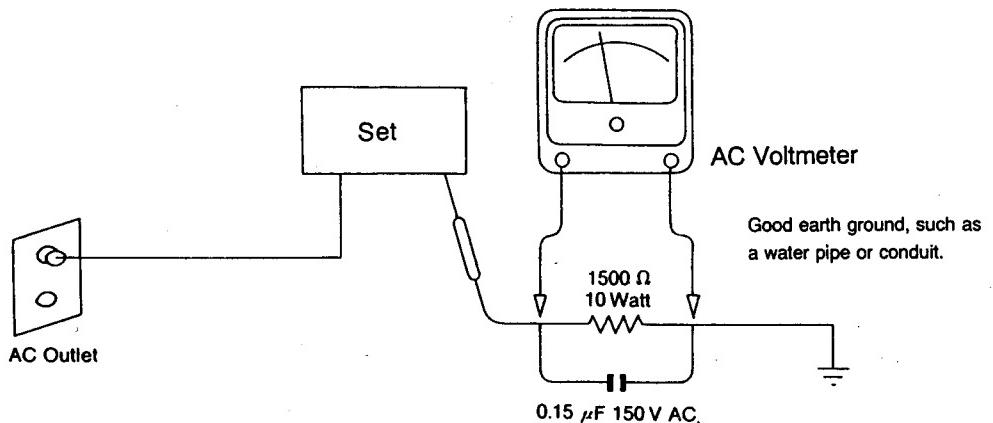

1. Many electrical and mechanical parts in this chassis have special safety characteristics that often pass unnoticed and the protection afforded by them cannot necessarily be obtained by using replacement components rated for higher voltage, wattage, etc. Replacement parts that have these special safety characteristics are identified in this manual and its supplements: electrical components having such features are identified by Δ in the schematic diagram and the parts list.

Before replacing any of these components, read the parts list in this manual carefully. The use of substitute replacement parts that do not have the same safety characteristics as specified in the parts list may create shock, fire, or other hazards.

2. Before returning the set to the customer, always do an AC leakage current check on the

exposed metal parts of the cabinet, such as terminals, screw heads, and metal overlays, to be sure the set is safe to operate danger of electrical shock. Plug the AC line cord directly into a 120 V AC outlet (120 V AC version only). (Do not use a line isolation transformer during this check.) Be sure your AC voltmeter has a sensitivity of 5000 Ω per volt or greater. Then connect a 1500 Ω 10 watt resistor, paralleled by a 0.15 μ F 150 V AC capacitor, between a known good earth ground (such as a water pipe, or conduit) and the exposed metallic parts, one at a time. Measure the AC voltage across the combination of a 1500 Ω resistor and a 0.15 μ F capacitor. Reverse the AC plug at the AC outlet and repeat AC voltage measurements for each exposed metallic part. Voltage measured must not exceed 0.75V RMS. This corresponds to 0.2 mA AC. Any value exceeding this limit constitutes a potential shock hazard and must be corrected immediately.

At 5000 Ω per volt or greater sensitivity,
the reading should not exceed 0.75 V.

Place the probe on each exposed metallic part.

SPECIFICATIONS

No.	Description	Unit	Nominal	Limit
1	RMS output power; both channels driven at 40 Hz-20 kHz freq., 0.08% THD, 8 Ω load. both channels driven at 1 kHz freq., 0.08% THD, 8 Ω load	W	≥53	≥50
2	Inter Modulation distortion (60 Hz-7 kHz=4:1 SMPTE) at 8 Ω load, 50 W output.	%	≥55	≥50
3	Input sensitivity at 1 kHz freq., 8 Ω load, 50 W output.	PHONO CD, TAPE	mV mV	2.5 ± 0.2 150 ± 10
4	PHONO overload at 1 kHz freq., 0.1% THD PHONO input → TAPE2 MON. output	mV	≥145	≥140
5	PHONO equalization RIAA 40 Hz - 20 kHz, TAPE2 MON. output	dB	RIAA +1	RIAA ±1.5
6	Frequency response at -3 dB	CD, TAPE	Hz	10 - 55000
7	Signal to noise ratio IHF-A weighted at volume max.	PHONO CD, TAPE	dB dB	≥73 ≥95
8	Tone control at 1 kHz 0 dB	100 Hz 10 kHz	dB dB	±10 ± 1 ±10 ± 1
9	Channel Separation at input shorted CD, TAPE	1 kHz 10 kHz	dB dB	≥55 ≥53
10	Crosstalk at 1 kHz freq. input shorted	CD⇒PHONO	dB	≥67
11	Total harmonic distortion at 40 Hz - 20 kHz freq., 8 Ω load, 50 W output	40 Hz 1 kHz 20 kHz	%	≤0.03 ≤0.03 ≤0.03
				≤0.05 ≤0.05 ≤0.05

General

Speaker load impedance	8 Ω
Power consumptions	340 W
Dimensions (W × H × D)	440 × 110 × 245 mm (17-5/16 × 4-11/16 × 9-11/16)
Weight (Net)	6.3 kg (13.9 lbs)

Power requirements:

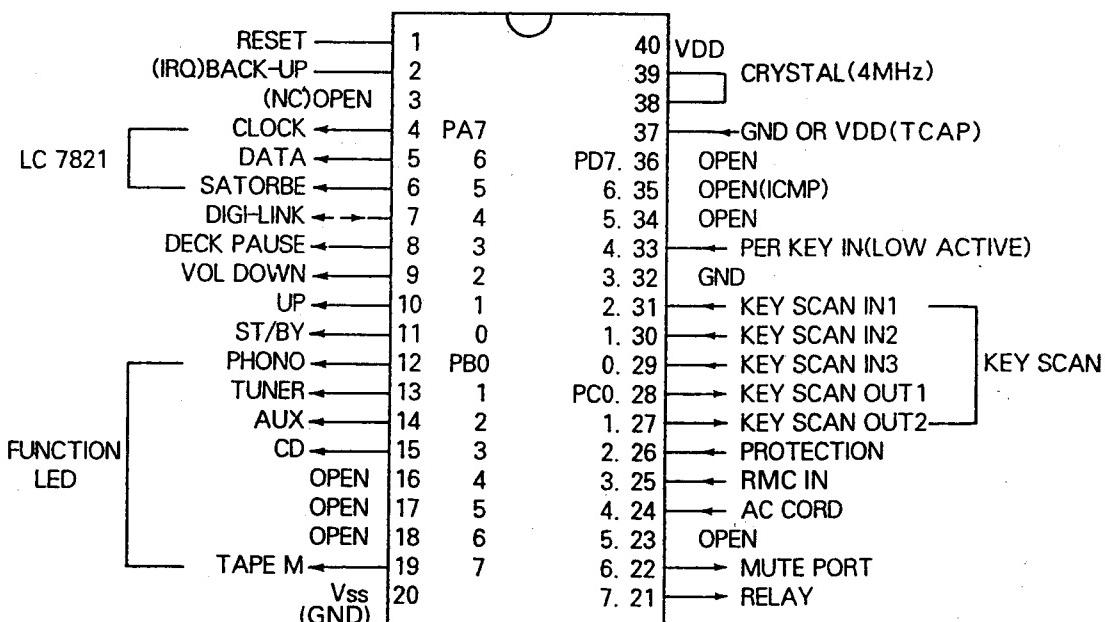

- A: 120 V 60 Hz for American/Canadian version
- B: 120/220 V 60/50 Hz multi voltage version (switchable)
- D: 230 V 50 Hz German/Gerneral European version
- E: 240 V 50 Hz for UK/Australian version
- G: 220 V 50 Hz for Other Area

Notes:

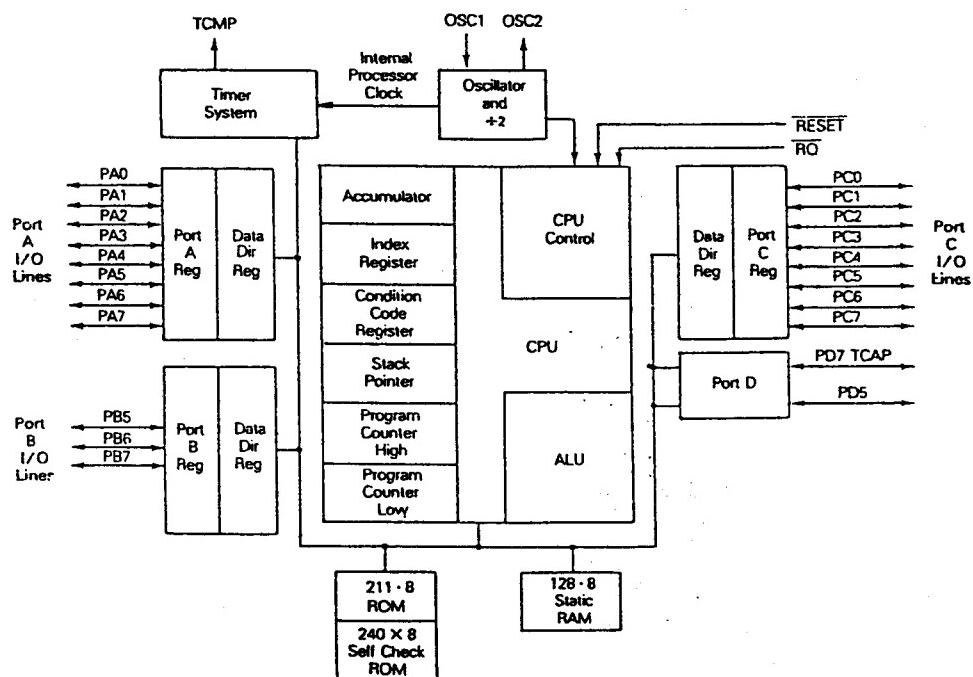

1. Nominal specs represent the design specs. All units should be able to approximate these some will exceed and some may drop slightly below these specs. Limit specs represent the absolute worst condition that still might be considered acceptable: in no case should a unit fail to meet limit specs.
2. This manual is based on the European (D) standard, and provides information on regional circuit modification through the use of alternate schematic diagram or wiring diagram, and information on regional component variations through the use of parts lists. Design and specifications subject to change without notice.

TROUBLESHOOTING

Symptom	Cause and Remedy
Amplifier inoperative.	<ul style="list-style-type: none"> ● Faulty AC power cord. Replace. ● Defect in the power switch. Replace. ● Broken wire in the power transformer. Replace the power transformer. ● Blown fuse. Replace the fuse.
Fuse blows when power is turned on.	<ul style="list-style-type: none"> ● Defective power transformer. Replace. ● Short in the primary or secondary of the transformer circuitry. Replace. ● Damaged rectifying diodes D601~D604. Replace the defective diode(s). ● Short in the rectifying circuit. Repair the short.
No sound from both channels or one channel	<ul style="list-style-type: none"> ● Speaker switch A or B defective. Replace the defective switch(es). ● Defective in transistor Q311L/R, Q312L/R on the main board. Replace the defective transistor(s).
Headphones inoperative.	<ul style="list-style-type: none"> ● Defective resistor R401L/R. Replace.
All the inputs inoperative.	<ul style="list-style-type: none"> ● Defective IC IC102, IC103, IC201, IC202. Replace the defective IC(s).
All the inputs work normally except phono.	<ul style="list-style-type: none"> ● Defective IC101. Replace.
Loudness has no effect.	<ul style="list-style-type: none"> ● Defective loudness switch. Replace. ● Defective R201L/R, R202L/R, C201L/R, C202L/R. Replace
Bass control has no effect.	<ul style="list-style-type: none"> ● Variable resistor VR204 defective. Replace. ● Defective R212L/R, R213L/R, C212L/R, C213L/R. Replace.
Treble control has no effect.	<ul style="list-style-type: none"> ● Variable resistor VR203 defective. Replace. ● Defective R214L/R, R215L/R, C214L/R. Replace.

PRODUCT SAFETY NOTICE

Each precaution in this manual should be follower during servicing. Components identified with the IEC symbol Δ in the parts list and the safety can be of special significance. When replacing a component identified with Δ , use only the replacement parts designated, or parts with the same ratings of resistance, wattage or voltage that are designated in the parts list in this manual. Leakage-current or resistance measurements must be made to determine that exposed parts are acceptably insulated from the supply circuit before returing the product to the customer.

19	Volume BASS/TREBLE, with Nut	3208069010	2				Components identified with the IEC symbol Δ in the parts list and the safety can be of special significance. When replacing a component identified with Δ , use only the replacement parts designated, or parts with the same ratings of resistance, wattage or voltage that are designated in the parts list in this manual. Leakage-current or resistance measurements must be made to determine that exposed parts are acceptably insulated from the supply circuit before returning the product to the customer.

**FRONT B'D
4009100200**

Model No. : AX-4050R

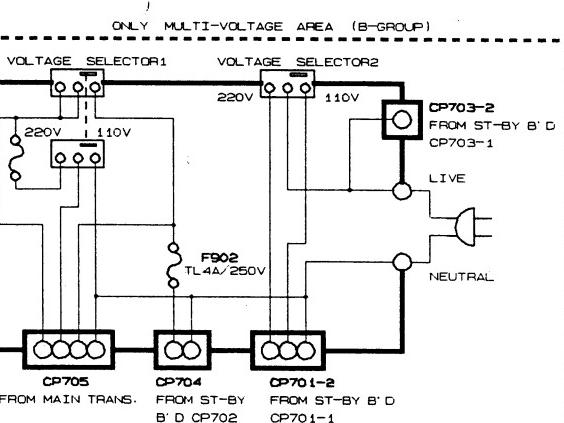

**SPKR SEL B'D
4009100210**

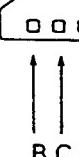

NOTES:
 1. Resistor values are indicated in ohms unless otherwise specified.
 $R=1\text{-}1000 \text{ M}=1\text{-}000\text{-}000$!
 2. Capacitor values are indicated in microfarads unless otherwise specified.
 $C=\mu\text{-micro}-\mu\text{-farad}$

CAUTION:
 Safety precaution to be followed during servicing:
 1. Since those parts marked with \triangle are critical parts for safety, use only the one described in the parts list.
 2. After returning the set to the customer, make appropriate leakage current or resistance measurements to determine the exposed parts are properly insulated from the supply circuit.
